Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase "the bracket" lacks proper antecedent basis in claim 12.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8-9, and 12 as best understood are rejected under 35 U.S.C. 102(b) as being anticipated by Spiegelhoff. Spiegelhoff shows the use of a chair (5) having an adjustable arm comprising a parallel arm mechanism comprising a first (23) and second (25) link mounted between a back support (10) and an armrest body (6) atop a bracket (15) which inherently could be maintained 6 inches above a rear portion of the seat of the chair (when locked in place), as Spiegelhoff shows the use of a locking mechanism (28).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3636

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-3,13,16 and 18-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Spiegelhoff. The method steps as recited would have been incorporated within the use of the invention as taught by Spiegelhoff.

Claims 8-10,12,14-15 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schwartz et al. in view of Spiegelhoff. Schwartz et al shows the use of an office chair (t2) on a movable base having a bracket (58) with a cavity therein (50). The bracket can inherently be mounted and "selectively fixed" at six inches above the plane of a top of a seat of the chair. Schwartz et al., shows all of the teachings of the claimed invention except the use of a parallel linkage arms mounted between a back support and an armrest body. Spiegelhoff shows the use of an armrest support arm (6) mounted on first and second linkage arms pivotally connected to a back support. It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the chair of Schwartz et al., with the parallel arm/linkage mechanism as taught Spiegelhoff in order to allow for a quick and easy armrest adjustment. Furthermore, the method steps as recited would have been incorporated within the use of the invention as taught by Schwartz et al. in view of Spiegelhoff.

Response to Arguments

Applicant's arguments with respect to claims 2-3,8,13,14 and 17 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 3636

Allowable Subject Matter

Claims 1,4-7,11 are allowed over the prior art made of record.
